

HNI Corporation

Introduction

This case study of HNI Corporation is based on an October 2019 survey of Kenna Security customers by TechValidate, a 3rd-party research service.

“Minimized time to organize and analyze vulnerabilities and effective tracking for CVE fixes.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Kenna Security:

- Vulnerability management challenges they experienced that led them to implement the Kenna Security Platform:
 - Too many vulnerabilities with no way to effectively prioritize
 - Inefficiencies in vulnerability remediation

Use Case

The key features and functionalities of Kenna Security that the surveyed company uses:

- Approaches used to prioritize vulnerabilities prior to Kenna:
 - Use rating system from scanner
- How they evaluate the success of their Kenna Security platform implementation:
 - Reduction in Mean Time To Remediate (MTTR)
 - Reduction in reporting time
- Kenna’s primary advantage(s) over other vulnerability management platforms:
 - Kenna goes beyond basic risk scoring and tells them what they need to fix first
 - Kenna provides meaningful and actionable data for remediation (remediation intelligence)
 - Kenna is updated continuously with real-time information

Results

The surveyed company achieved the following results with Kenna Security:

- Reduction of time spent on the following activities, since using Kenna:
 - Time spent on Vulnerability Investigation: over 75%
 - Time spent on remediation: over 50%
 - Time spent on reporting: over 75%

Company Profile

Company:
HNI Corporation

Company Size:
S&P 500

Industry:
Consumer Products

About Kenna.VM

Kenna is a software-as-a-service Risk and Vulnerability Intelligence platform that accurately measures risk and prioritizes remediation efforts before an attacker can exploit an organization’s weaknesses. Kenna automates the correlation of vulnerability data, threat data, and 0-day data, analyzing security vulnerabilities against active Internet breaches so that InfoSec teams can prioritize remediations and report on their overall risk posture.
